EDUCATION

Vilnius University

Bachelor of
software
engineering

2022 - 2026

Lazdijai Motiejus Gustaitis gymnasium

2014 - 2022

EXPERIENCE

Junior Full-Stack Developer (part-time)

GP Transco | 06/01/2025 - present

- Integrated safety data and statistics provided by the Samsara IoT API into our systems after mapping it to align with internal structures. Implemented periodic tasks to maintain up-to-date records. Using Ruby on Rails, PostgreSQL.
- Created a dashboard page to display all drivers currently at GP Transco HQ along with their assigned trucks, trailers and statuses. Using React, Ruby on Rails, PostgreSQL.

PROJECTS

- [Various optimization algorithms ↗](#), including gradient descent, Nelder-Mead deforming simplex method and others. Implemented in **Python** and visualized using Matplotlib.
- [Collibri ↗](#). A note-taking app. My responsibility for this project was to implement quiz functionality by using **C#, React, HTML, CSS, Javascript, REST API, PostgreSQL**.
- [Multi-client text chat server and client ↗](#). Created using **C**, fork() and select() Unix system calls.

ABOUT ME

I recently graduated with a Bachelor's in Software Engineering from Vilnius University, where I enrolled immediately after high school driven by a love of mathematics and problem-solving. Since then, I have gained practical experience working part-time as a junior full-stack developer, and I am now looking to take the next step in my career with a full-time role in software engineering.

TECHNICAL SKILLS

- C#
- JavaScript
- HTML
- CSS
- SQL
- Ruby
- C
- Java
- Python

ADDITIONAL LEARNING

- [Certificate of Completion: AI Fluency Framework & Foundations ↗](#)
- Lithuanian Young Mathematicians Extramural School 2020 - 2022
